SB-88

The Stirling Broadcast SB-88 Domestic Monitor is a two-way loudspeaker designed by Derek Hughes to essentially be a scaled down version of our BBC LS3/6 Reference loudspeaker but without the 'super-tweeter'.

The cabinets use the same thin wall birch plywood panels as used in our LS3/6 and LS3/5a V2 loudspeakers, with double thickness rubber damping pads to dampen cabinet wall resonances and foam to dampen internal standing waves. The low and high frequency units are the same custom units as utilised in the LS3/6.

The speaker is ideal for situations where the LS3/6 is deemed too large for the domestic conditions, or for the size of the listening room, as it sounds extremely similar to its larger brother and gives little away in the bass area.

The SB-88 was reviewed in the February 2014 edition of the Stereophile magazine and is listed as a Stereophile Class B speaker for that year. Stereophile summed them up with "With a convincing soundstage and a sound that was laid-back, sweet, and honest, the SB-88 always drew ST deep into the music."

The SB-88 comes with our standard 5 year warranty on the drive units and crossovers.
